ASSISTANT COMMISSIONER OF PATENTS
Washington, D.C. 20231

Dear Sir:

Assignee, through its attorney of record, represents that it is the owner of the entire interest in the above-identified patent application. Assignee is also the owner of the entire interest in U.S. Application Serial No. 10/044,341 (the "341" application). The above-identified application and the '341 application are both owned by the Assignee by virtue of the assignments recorded in the United States Patent and Trademark Office at, respectively, Reel 012484 Frame 0518 and Reel 012485 Frame 0303.

Assignee disclaims, except as provided below, the terminal part of any patent granted on the above-identified application that would extend beyond the expiration date of the full statutory term of the '341 application, as presently shortened by any terminal disclaimer. Assignee agrees that any patent so granted on the above-identified application shall be enforceable only for and during such period that the legal title to it and the '341 application and any patent issuing therefrom are commonly owned. This agreement by the assignee runs with any patent granted on the above-identified application and is to be binding upon the grantor, its successors or assigns.

Assignee, however, does not disclaim any terminal part of any patent granted on the above-identified application prior to the expiration date of the full statutory term of any patent issuing from the '341 application in the event that such patent issuing from the '341 application later: expires for failure to pay a maintenance fee, is held unenforceable, is found invalid by a court of competent jurisdiction, is statutorily disclaimed in whole or terminally disclaimed under 37 C.F.R. § 1.321(a), has all claims canceled by a reexamination certificate, is reissued or is otherwise terminated prior to expiration of its statutory term as presently shortened by any terminal disclaimer, except for the separation of legal title stated above.

Docket No. 14689.12
Date: January 31, 2007

Assignee hereby declares that all statements made herein of its own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

Dated this 31st day of January, 2007.

Respectfully submitted,
